

# Unlock Collaborative Caregiving

Prepare to Care

Assisted Living facilities, Continuous Care Retirement Communities, and families know the key to coordinating care is preparedness.

Keep necessary care information secure and centrally accessible, so everyone engaged in your loved one's care stays up to date.

## Shared Vital Information

Grant caregivers access to select information, and switch between collaborators to view or edit information.

## Improved Care Coordination

Integrate LifeSite with leading care coordination apps for an improved, more efficient process.

### Life Checklists

Guide users to provide information for important life events like caregiving and care management.

### Encrypted Messaging

Alert caregivers to necessary documents or important changes with secure, real-time messages.

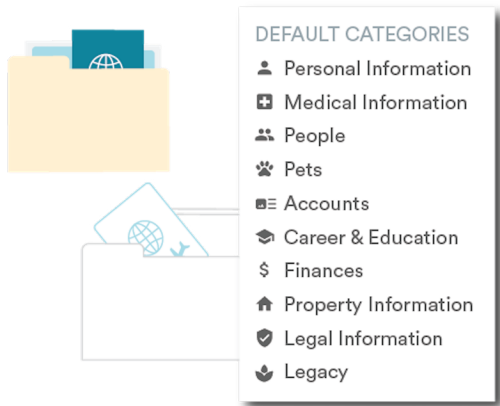

### Secure File Sharing

Eliminate the risk of losing paper files or emailing attachments through unsecure, unencrypted servers.

### Stay Up-to-Date

Receive notifications on your dashboard and via email every time a collaborator accesses your account.

## More Than a File System

### *Dozens of pre-organized categories*

You and your collaborators save information where it makes sense, not in one massive, cluttered folder.

### *Spend time on what matters*

LifeSite's organized, intuitive structure makes information file retrieval fast and easy.

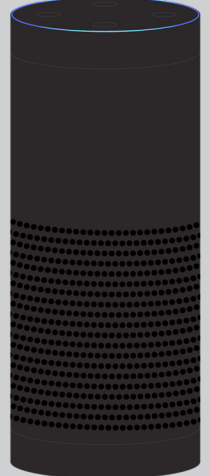

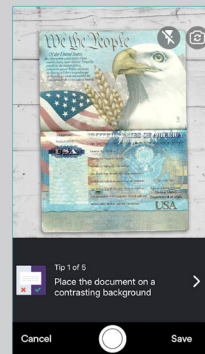

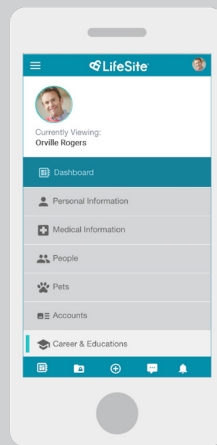

## Modern Access Tool

### *Perfect for any job*

Whether you are a care coordinator, caregiver, or care recipient, LifeSite is accessible on the device you're most comfortable using.

### *Save and access anytime, anywhere*

"Point and shoot" with the free mobile app to quickly scan and upload documents like prescriptions or insurance cards. "Ask Alexa" on any Amazon Alexa-enabled device to look up your information.

Voice First technology empowers older adults to access valuable services but more importantly, helps them be engaged participants in our society.

— Mary Furlong, CEO of Mary Furlong & Associates, and a leading authority on the longevity marketplace

## Industry-Leading Security

LifeSite's layered encryption and unique user encryption keys are all part of multiple layers of privacy and security protocols that constantly monitor and safeguard your information - no matter which device you use.
