RED HERRING 100 WINNER N. AMERICA

Accessibility Leads to Peace of Mind

The Digital Vial of Life Program gives care recipients and family instant access to information like medical conditions and prescriptions during emergencies or for daily care.

Information When You Need It

“Having the medical information of your loved ones at hand could be invaluable during an emergency, particularly when the patient is unable to answer questions.”

- AARP

“88% of adults still store their important documents in a file cabinet, folder or not at all.”

- Yaron Ben-Zvi, CEO of Haven Life (MassMutual)

Information Where You Need It

Online storage is safer and more convenient when compared to refrigerators, file cabinets, and even physical safes

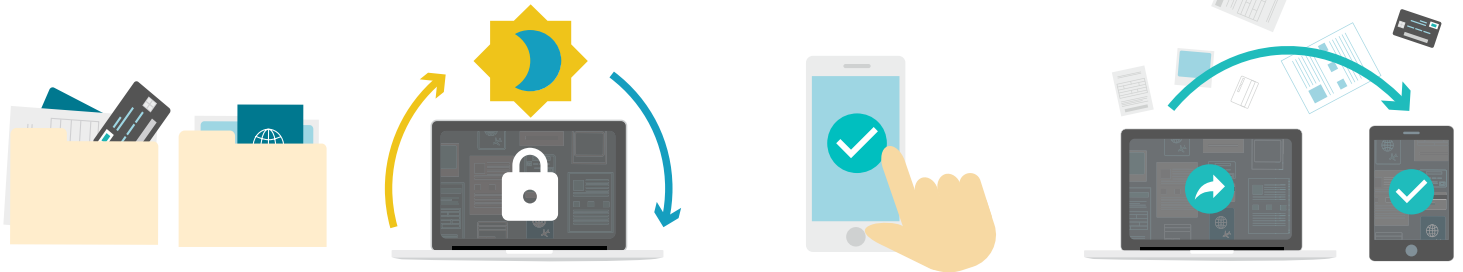

Secure sharing gives loved ones and even medical personnel immediate access to your life-saving information

Create your legacy with valuable life assets like recipes, photos, or military benefits, then share with your children and grandchildren

Modern Tool For Your Information

Get Organized

Dozens of predefined categories and guided life event checklists saves time when you or family are entering information.

Ultra-Secure

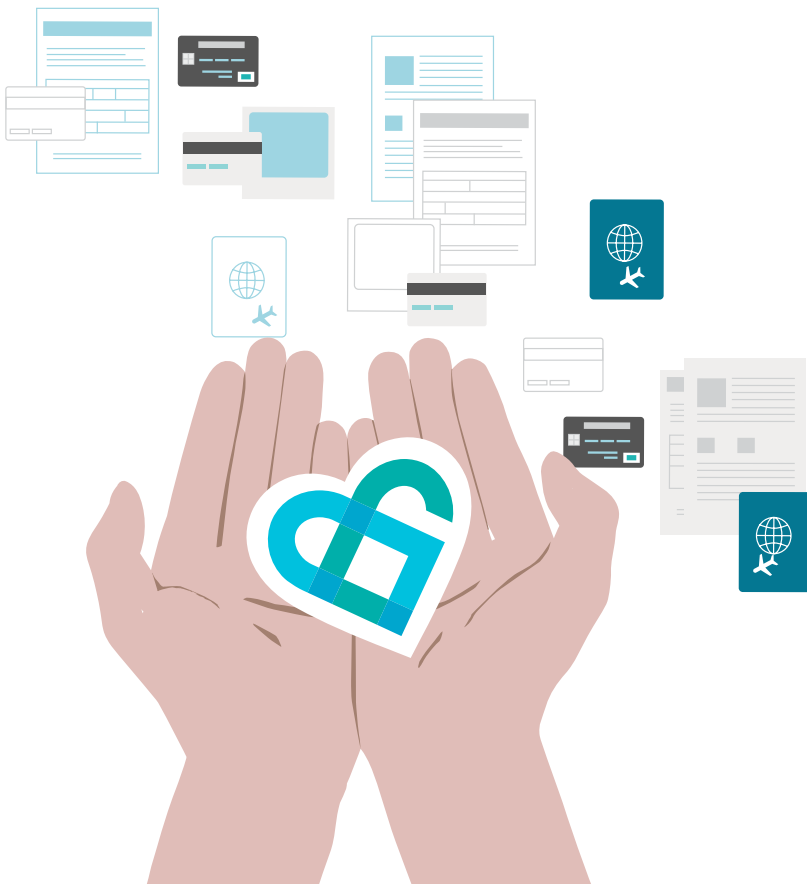

Our patented security protects every care recipient with your own unique encryption key and layered encryption.

Mobile Access

Free mobile and Amazon Alexa apps for anytime, anywhere access, simple file scanning, and hands-free voice lookup.

Collaborate

Managing information is a team sport. Care recipients can give family access to some or all of your account.

Digital Vial of Life Program for CCRCs

Provide LifeSite to care recipients and employees

CCRC-branded landing page and collateral for program launch

LifeSite assistance with program adoption, engagement, and onboarding

Customizable intake, estate, and financial guidance through CCRC-branded life checklists
